

❀ Method for finding Latitude & Longitude of a spot. ❀

❀ Requirements of mobile handset having,

OS → Android

Version → Min 2.2.3 and above

Processor → 850 mhz and above

GPS → Yes, supported

{ Wi-Fi → 802.11b support

or GPRS → For initial download of software.

❀ Start internet on your mobile and open following website of Department of Electronics and Information Technology,

[www.apps.mgov.gov.in](http://www.apps.mgov.gov.in) ↓

❀ ECI polling station location Icon will appear for location of latitude & longitude of a particular spot

(Auto generated)

click on download ↓

❀ Install the downloaded software

❀ You will get  icon on your mobile.

❀ Activate GPS and start locating lat-long directly from satellite (without internet).

❀ You will get lat-long in decimal point, take atleast 6 digits after decimal point. Then use lat-long converter (available in Google site) to convert into degree - min - sec.

Thanks

Avinash S. Pabil.
